<b>Office Action Summary</b>	<b>Application No.</b> 10/089,890	<b>Applicant(s)</b> PROUDLEY ET AL.	
	<b>Examiner</b> David C. Payne	<b>Art Unit</b> 2638	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in United Kingdom on 20 April 2001. It is noted, however, that applicant has not filed a certified copy of the 1110126.1 application as required by 35 U.S.C. 119(b).

### ***Claim Objections***

2. Claims 6-12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim, See MPEP § 608.01(n). Accordingly, the claims not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 12 recites the limitation "the exterior of the composite structure" in line 3. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2 322 479 A.

Regarding claims 1-5,

the '479 publication discloses an optical device with all the limitations set forth in the claims including: an optical coupling for connecting a first optical transmission means (25F1 in Fig. 4) embedded within a composite to a second optical transmission means external to the composite (25F2, Fig. 4), the coupling comprising: means for locating the position of the first optical transmission means embedded within the composite (Fig.10 and page 15 lines 19-27)\*, a passageway formed within the composite to the embedded first optical transmission means (Fig. 10-1 1)', an optical connection established between the first and second optical transmission means at the intersection of the passageway and the first optical transmission means (Fig. 12)., wherein the passageway comprises a drilled or machined orifice through the composite from an exterior surface thereof to the first optical transmission means to a depth sufficient to sever the first optical transmission means (page 15 lines 19-27),' a protective cap provided in the passageway (page 12 lines 25-27),\* wherein the tip of the first transmission means and the adhesive layer being the position marker and the depth marker to indicate the position and the depth of the passageway to be formed (Fig. 10, page 15 lines 19-27),. an interface means alignable with the passageway to

be in optical communication with first optical transmission means at the optical interface surface, the interface means being arranged to be accessible to the second optical transmission means (26C in Fig. 12), beam-steering resin block disposed in the composite (26C in Fig. 12)\*, the end of the first optical transmission means being slanted and coated with metallic coating to provide beam splitting function within the composite (page 12 lines 4-8).

### ***Conclusion***

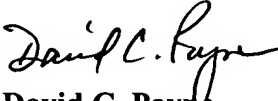

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David C. Payne whose telephone number is (571) 272-3024. The examiner can normally be reached on M-F, 7a-4p.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Vanderpuye can be reached on (571) 272-3078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
